Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharp et al. in view of Salvo et al. (US6,341,271) and Official Notice.

Sharp et al. disclose order information receiving means for receiving via a computer global network 150 at least first and second order information of merchandise (See for example Col. 1, line 56); the first and second order information being formed based on respective first and second purchase requests received via respective first and second sales channels (i.e., first and second customers; See Col. 1, lines 54-58) that use the network (See for example Col. 3, lines 14-17); and stock control means for controlling a stock of said merchandise to be distributed to the first and second sales channels based on the first and second order information.

Sharp et al. lack the specific teaching of the second purchase request being received via a second sales channel which is a point of sales location that does not use the network; the supplier supplying the merchandise based on an actual sales condition; and the network being specifically the Internet utilizing web pages.

Salvo et al. teach an e-commerce system utilizing web pages on the Internet to receive order information and further teach that it is well known to grasp an actual sales condition (i.e., real-time needs) and supply the merchandise based on the sales condition (See for example Col. 3, lines 40-62; and Col. 7, line 38 – Col. 8, line 4).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Sharp et al. to include the supplier supplying the merchandise based

on an actual sales condition, and the network being the Internet utilizing web pages, as taught by Salvo et al., in order to provide the proper inventory as needed (See for example Salvo et al., Col. 7, lines 41-42).

The Examiner takes Official Notice that it was well known in the art of commerce to make a purchase request received via a second sales channel which is a point of sales location **(i.e., any location from which a second buying customer makes a purchase request)** that does not utilize the network **(for example: mail, face-to-face, phone, or fax communication)**.

*Re claims 16-20, the "first order information forming **device**" would be the computer using the network (as disclosed in Sharp et al.) and the "second order information forming **device**" would be the receiving fax machine or phone.*

Re claims 2, 3, 7, 8, 12, 13, 17, and 18: Sharp et al. in view of Salvo et al. lack the specific teaching of stopping the supply of merchandise due to the sales debut of a new product. However, it is well known in the art to stop the supply of a product when it is about to be replaced by a new product and it would have been obvious to one of ordinary skill in the art at the time of the invention to employ the step of stopping the supply of a product for a predetermined period before a new product is released, to prevent the accumulation of unwanted inventory.

Response to Arguments

Applicant's arguments received 7/6/2005 have been considered but are not persuasive. The applicant repeatedly argues that the prior art does not teach a second

Art Unit: 3627

sales channel which is a point-of-sale location. The Examiner has addressed this argument in the rejection above to show how the prior art does teach the limitation.

On page 12, line 6 of the argument, the applicant mentions that claim 1 claims a point-of-sale terminal. However, no such device is claimed, and instead claim 1 claims a "point-of-sale location".

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
